 County: **Siskiyou**
 Diversion Within: **NE $\frac{1}{4}$ of SE $\frac{1}{4}$ Section 6 T41N, R09W, MB&M**

Year of First Use: **1964**
 Parcel Number:

A. **Water is Used Under:** Riparian claim Pre-1914 right Other (explain): *+ adjudicated*

B. **Year of First Use:** (Please provide if missing above)

C. **Amount of Use:** Enter the amount (or the approximate amount) of water used each month, using the table below.

Amounts below are in: Gallons **10,000** Million Gallons (MG) Acre-feet (AF) Other

Year	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	Total Annual
2004													~ 10,000
2005													0
2006													0

D. **Purpose of Use – Specify number of acres irrigated, stock watered, persons served, etc.**

Irrigation _____ acres; Stockwatering _____; Domestic _____;

Other (specify) *Ocassional watering of work for dust control.*

E. **Changes in Method of Diversion – Describe any changes in your project since your previous statement was filed.**
 (New pump, enlarged diversion dam, location of diversion, etc.)

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

- a. Are you now employing water conservation efforts? YES NO
 Describe any water conservation efforts you have initiated:

- b. If you are claiming credit for water conservation under section 1011 of the Water Code for your claimed pre-1914 appropriative right, please show the amount of water conserved:
N/A

Reduction in Diversions:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

Reduction in consumptive use:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above surface water use reductions due to conservation efforts. YES NO

*Review
05/7/07*

2. Water quality and wastewater reclamation

- a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree, which unreasonably affects such water for other beneficial uses? YES NO
- b. If you are claiming credit due to the substitution of reclaimed water, desalinated water or polluted water in lieu of a claimed pre-1914 appropriative right under section 1010 of the Water Code, please show amounts of reduced diversions and amounts of substitute water supply used:

Amount of reduced diversion:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

State the type of substitute water supply:

Amount of substitute water supply used:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above statement concerning reduced diversions due to the use of a substitute water supply. YES NO

3. Conjunctive use of surface water and groundwater

- a. Are you now using groundwater in lieu of surface water? YES NO

- b. If you are claiming credit due to the substitution of groundwater for a claimed pre-1914 appropriative right under section 1011.5 of the Water Code, please show the amounts of groundwater used:

Year _____ (AF/MG) Year _____ (AF/MG) Year _____ (AF/MG)

I have data to support the above statement concerning reduced diversions due to the use of groundwater. YES NO

I understand that it may be necessary to document the water savings claimed in "F" above if credit under Water Code sections 1010 and 1011 is sought in the future.

I declare that the information in this report is true to the best of my knowledge and belief.

ITEM CONTINUATION

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the water source by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user has the right to divert all the natural flow of a stream for his own use. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water or to divert water from a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" sources to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

"The energy challenge facing California is real. Every California needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.srcc.ca.gov>".

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Proposes a new appropriation upstream from their diversions, and (3) provides a record of water use. (2) enables State to determine if additional water is available for future with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriations.

An appropriate right is required for use of water on nonirrigated land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by irrigation users. Since 1914, new appropriators have been required to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Reservation of the riparian right to the natural flow of a stream but may not be used to store water for later use or divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

There are two principal types of surface water rights in California. They are riparian and appropriate rights.

I have data to support the above surface water use reductions due to conservation efforts. YES NO

For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.swecc.ca.gov>.
 "The energy challenge facing California is real. Every California needs to take immediate action to reduce energy consumption."

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Statements of Water Division and Use must be filed by April 1st of each year. Since 1914, new appropriators have been required to obtain a permit and license from the State. Approprate rights can be granted to waters "foreign" to the natural stream system. An appropriate right is a supply not needed by riparian users. Generally, appropriative rights may be exercised only when there is a surplus of water available for storage of water. Generally, appropriative rights may be exercised with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to determine if additional water is available for future purposes. A new appropriation upstream from them will affect their use of water, (3) assists the State to determine if additional water is available for future purposes.

Water rights in California are based on a natural stream system. Only natural streams are entitled to the natural stream system. A different water may be used to divert the natural flow of others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

A riparian right to the natural water may not be used to store water for later use or divert water which originates in a different water. Generally, a riparian user must share the water supply with other riparian users. Reservation of the riparian right to the natural water may be needed to serve a parcel. Generally, a riparian user must never have been served from the sources of supply by an intervening parcel without the same watershed as the water source and must never have been served from the sources of supply by an intervening parcel.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

DATED: 6-21-, 1993 at Woodland, California

Signature: Harry O. Walker

A riparain right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different water shed, or return flows from use of groundwater.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

- "Statement of Water Diversions and Use"
- "Information Pertaining to Water Rights in California"
- "Water Rights for Stockpond Construction Prior to 1969"
- "Appropriation of Water in California"

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

WITHIN: NE1/4 OF SE1/4 SECTION 06, T41N, R09W, MDB&M.

INSTRUCTIONS: Please complete Items A, B and C. Item D should be completed if you replaced all or part of your regular water supply with reclaimed or polluted water. RETURN THIS FORM BY JULY 1, 1990. (Additional information on reverse side of this form.)

- A. Amount of Use - Fill in the amount of water used each month. If monthly and annual use are not known, check the months in which water was used. Amounts Gallons below are: Acre-feet GPD (other)

	Jan.	Feb.	Mar.	Apr.	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.	Total Annual
1987			✓				✓	✓	✓				
1988					✓		✓		✓				
1989						✓		✓	✓	✓	✓		

- B. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation 6.2 - 6.4 Acres

Stockwatering _____

Domestic 3 - 6 persons

Other (specify) _____

- C. Changes in Method of Diversion - Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

None

- D. If part of the water listed in Part A consists of reclaimed or polluted water, please indicate the annual amounts of reclaimed or polluted water in the space below.

I declare under penalty of perjury that the information in this report is true to the best of my knowledge and belief.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the source of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus of water. Riparian rights are not needed by riparian users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water diversion concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:
